- **UI/UX** Implementation
- **AI-Assisted Workflows** (ComfyUI, Codex, automation tools)
- **Game Systems Design**
- **Animation Integration** (Unity Animator)

ABOUT ME

Unity Developer with a technical-artistic profile, capable of building complete systems (UI, gameplay, tools) and bringing a game to production.

FEATURED PROJECT

PAWPAL — MOBILE VIRTUAL PET GAME (UNITY)

PawPal is a mobile game developed in Unity that combines virtual pet care with interactive minigames and progression systems.

The goal is to create a more dynamic experience than traditional virtual pet games by introducing active gameplay, continuous interaction, and scalable systems.

I developed the project end-to-end, covering both technical and artistic aspects:

- Designed the overall project architecture in Unity
- Developed gameplay systems and minigames
- Implemented UI and user flow
- Integrated animations, VFX, and assets
- Designed scalable systems for future features
- Created 3D models, character assets, and UI elements

WORK EXPERIENCE

UNITY TECHNICAL ARTIST
